	Original Papers	Review Articles	Research Letters	Case Report	Editorial
Aims and Scope	Presentation of novel findings; well-structured, include comprehensive data and analysis.	Provide comprehensive, critical assessments of existing literature in the field of Nuclear Medicine. They aim to summarize current knowledge, identify gaps, and propose future research directions.	Concise communications of original research presenting findings derived from a targeted data set of high scientific relevance.	Published as short communications. The case should be presented in a manner that clearly highlights its uniqueness. Extensive introductions and discussions should be avoided.	Should present cogent, cohesive, and compelling discussions or important insights that advance understanding of an article the editorial is accompanying.
Title	Short, concise, a maximum of 50 words.		Short, concise, a maximum of 50 words and must start with "Research Letter:".	Short, concise, a maximum of 50 words.
